

# Contents

<b>1</b>	<b>General Introduction</b>	<b>1</b>
1.1	Coevolution . . . . .	2
1.2	Structured genotype-phenotype mappings . . . . .	3
1.3	This thesis . . . . .	5
<b>2</b>	<b>Evolutionary consequences of coevolving targets</b>	<b>9</b>
2.1	Introduction . . . . .	10
2.2	The Model . . . . .	11
2.3	Results . . . . .	13
2.3.1	Success Rates . . . . .	14
2.3.2	Generalizability . . . . .	14
2.3.3	Mutational stability . . . . .	18
2.3.4	Higher dimensional target functions . . . . .	19
2.4	Discussion . . . . .	20
2.4.1	Coevolution and optimization . . . . .	20
2.4.2	Side-effects of variable problem sampling . . . . .	25
2.4.3	Conclusion . . . . .	25
<b>3</b>	<b>Colicin diversity: a result of eco-evolutionary dynamics</b>	<b>27</b>
3.1	Introduction . . . . .	28
3.2	model . . . . .	29
3.3	results . . . . .	31
3.3.1	Typical temporal and spatial dynamics . . . . .	31
3.3.2	Hyperimmunity and multitoxicity: a phase transition . . . . .	33
3.3.3	Plasmid invasions . . . . .	37
3.4	Discussion . . . . .	38
3.4.1	Plasmid diversity . . . . .	38
3.4.2	The cost of defence . . . . .	39
3.4.3	Experimental data . . . . .	39
3.5	Conclusion . . . . .	40
<b>4</b>	<b>Individual- and population-based diversity in restriction-modification systems</b>	<b>43</b>
4.1	Introduction . . . . .	44
4.2	The model . . . . .	45
4.3	Results . . . . .	46
4.3.1	Individual- and population-based diversity . . . . .	47
4.3.2	Transition between modes . . . . .	50
4.4	Discussion . . . . .	53
4.4.1	Model predictions and comparison to experimental data . . . . .	53
4.4.2	Frequency-dependent selection and pairwise infectability . . . . .	54

---

4.4.3	Cooperation across levels . . . . .	55
4.4.4	Conclusion . . . . .	56
<b>5</b>	<b>Coevolutionary dynamics: information integration, speciation, and red queen dynamics</b>	<b>67</b>
5.1	Introduction . . . . .	68
5.2	The model . . . . .	69
5.2.1	Spatial embedding and local dynamics . . . . .	70
5.2.2	Some (evolutionary) properties of the density classification task	71
5.3	Results . . . . .	73
5.3.1	Two typical simulations . . . . .	74
5.3.2	Information integration and red queen dynamics . . . . .	76
5.3.3	Eco-evolutionary side-effects . . . . .	81
5.4	Discussion . . . . .	89
5.4.1	Specialists and generalists; neither ‘outfits’ a queen . . . . .	89
5.4.2	Red queen dynamics; quick, quick, slow . . . . .	92
5.4.3	Conclusion . . . . .	93
<b>6</b>	<b>Discussion</b>	<b>95</b>
6.1	A short review . . . . .	95
6.2	Sparse fitness evaluation . . . . .	97
6.3	Speciation, optimisation, and red queen dynamics . . . . .	99
6.4	Information integration . . . . .	99
6.5	Conclusion . . . . .	101
