

Contents

Chapter 1	General introduction	1
Chapter 2	Effects of pruning on biomass production and plant material harvest of five subtropical Chinese tree species	15
Chapter 3	Aboveground biomass allocation and leaf development of Chinese subtropical trees following pruning	29
Chapter 4	Leaf emergence and shoot production of two subtropical Chinese <i>Ficus</i> tree species following pruning	43
Chapter 5	Leaf efficiency of subtropical Chinese tree species following pruning	55
Chapter 6	Modelling tree growth as affected by pruning with <i>Feike Schieving</i> and <i>Heinjo During</i>	65
Chapter 7	Simulation of branch harvests with <i>Heinjo During</i> and <i>Feike Schieving</i>	95
Chapter 8	Summary and general discussion	115
	Samenvatting in het Nederlands	121
	Acknowledgements	125
	Curriculum Vitae	127
