

# List of Tables

3.1	The spatial organization of different segments	35
3.2	Definitions of concepts in organizational capabilities theory	37
4.1	Process theories of organizational development	49
4.2	Characteristics of the four stages in the Greiner model	51
4.3	Universal problems and possible growth trajectories	57
4.4	Development phases and dominant processes	60
4.5	Development phases and locational evolution	64
5.1	Intensive and extensive research: a summary	69
5.2	Sectoral pattern of gazelles in the Netherlands (in 1999)	72
5.3	Second stage of sample selection	72
5.4	Relocations in the telephone survey sample and other research	73
5.5	Matching procedure research sample	76
5.6	Characteristics of the firms in the research sample	77
6.1	Locational change within and outside the region	83
6.2	Consideration to locate outside the region	98
6.3	Three types of location decision processes and their theoretical rationale	100
7.1	Work experience and entrepreneurial network at the start-up phase	106
7.2	Incubator organization and initial sector, activities, and region	106
7.3	Necessary input relationships per type of activity	108
7.4	Ownership of premises	108
7.5	Necessary output relationships per type of activity	110
7.6	Reasons for delayed growth	112
7.7	Reasons for the plateau	113
7.8	Reasons for setback	114
7.9	Sequence and duration of development phases in the enterprise paths	121
7.10	Changes in the control of strategic decision-making in evolving enterprises	123
7.11	Typology of organizational structures	123
7.12	Changes in the organizational structure of evolving enterprises	124
7.13	General features of entrepreneurial networks	124
7.14	General features of regional customer linkages, in different sectors	124
7.15	General features of the regional customer linkages of professional business services, in different regions	126
7.16	Development mechanisms and necessary structures in time	127
7.17	Sequence and duration of phases in the growth path	130
8.1	Possible numbers of units of selection and external selection environments	140
8.2	Elements in the model of locational change	141
8.3	Elements of the theory of locational evolution	147
8.4	Locational events and locational evolution	150
