|--|-----|
| Preface  | 7   |
| 1 Friend and foe: health and the environment from an historical-epidemiological perspective        | 9   |
| 1.1 Introduction   | 10  |
| 1.2 Determinants of health   | 10  |
| 1.3 From a patchwork of isolated communities to the 'global village'                               | 12  |
| 1.4 An unhealthy network   | 13  |
| 1.5 A 17th century Health Status and Forecast Report   | 15  |
| 1.6 Splendid isolation   | 16  |
| 1.7 An end to the Englishman's right to be filthy  | 16  |
| 1.8 Very healthy people: a triumph over the micro world  | 18  |
| 1.9 Life style and the social environment  | 20  |
| 1.10 Overlapping and interacting environments: an accumulation of squalor?                         | 21  |
| 1.11 Discussion: an environmental health agenda  | 23  |
| 1.12 References  | 27  |
| 2 A framework for assessing the significance of health impacts of environmental exposures          | 31  |
| 2.1 Introduction   | 32  |
| 2.2 Health   | 32  |
| 2.3 Determinants of health   | 37  |
| 2.4 Indicators of environmental health impact  | 43  |
| 2.5 Qualitative assessment of the available exposure response relations                            | 52  |
| 2.6 Finally  | 52  |
| 2.7 References   | 56  |
| 3 Dealing 'sensibly' with environmental risk   | 61  |
| 3.1 Introduction   | 62  |
| 3.2 Risk: a dragon with many heads   | 63  |
| 3.3 A proposition for sensible procedures  | 73  |
| 3.4 Discussion   | 86  |
| 3.5 References   | 88  |
| 4 An aggregate public health indicator to represent the impact of multiple environmental exposures | 93  |
| 4.1 Introduction   | 94  |
| 4.2 Concepts and methods   | 96  |
| 4.3 Health impact assessment   | 98  |
| 4.4 Results  | 100 |
| 4.5 Discussion   | 103 |
| 4.6 References   | 108 |

|     |  |     |
|-----|--|-----|
| 5   | Valuing the health impact of air pollution: Deaths, DALYs or Dollars?      | 111 |
| 5.1 | Fifty years on   | 112 |
| 5.2 | Problems for policy makers   | 112 |
| 5.3 | Putting money where public health profits most                             | 113 |
| 5.4 | Healthy time as a metric   | 115 |
| 5.5 | Trading health for wealth or wealth for health                             | 116 |
| 5.6 | Impact assessment  | 116 |
| 5.7 | Deaths, DALYs and dollars (Euro)   | 123 |
| 5.8 | Discussion   | 127 |
| 5.9 | References   | 133 |
| 6   | Community noise burden of disease: an impossible choice of endpoints?      | 139 |
| 6.1 | An inescapable nuisance  | 140 |
| 6.2 | Characterisation of noise exposure   | 141 |
| 6.3 | Reported effects on human health and well being                            | 142 |
| 6.4 | 'Noisy' epidemiological data   | 146 |
| 6.5 | Assessment of noise attributable disease burden                            | 148 |
| 6.6 | Approaches for disease burden assessment                                   | 149 |
| 6.7 | Impact assessment based on blood pressure shifts                           | 153 |
| 6.8 | Discussion   | 156 |
| 6.9 | References   | 160 |
| 7   | Environment and Health in the OECD region: "losing health is losing money" | 163 |
| 7.1 | Introduction   | 164 |
| 7.2 | Concepts and methods   | 165 |
| 7.3 | Environmental health impact in the OECD                                    | 169 |
| 7.4 | Discussion   | 183 |
| 7.5 | References   | 189 |
| 8   | Summary and final remarks  | 195 |
| 8.1 | Relevance of environmental factors   | 195 |
| 8.2 | Dealing with risk in four sensible manners                                 | 196 |
| 8.3 | Deaths or DALYs?   | 197 |
| 8.4 | Health as an economic value  | 198 |
|     | Samenvatting   | 201 |
|     | Dankwoord  | 209 |
|     | Curriculum vitae   | 211 |
