Figures	9
Tables	11
Abbreviations and acronyms	13
Dankwoord	15
1 Introduction	17
1.1 The Mediterranean area	17
1.2 Land Use and Land Cover Change modelling (LUCC)	18
1.2.1 Driving forces	18
1.2.2 Spatial interaction and neighbourhood effects	19
1.2.3 Validation	19
1.3 Objectives and thesis outline	20
2 Land Use and Land Cover Change modelling (LUCC): a review of Mediterranean land cover change models	23
2.1 Introduction	23
2.2 Land use change and land cover change concepts	23
2.2.1 Driving forces	23
2.2.2 Spatial interaction and neighbourhood effects	24
2.2.3 Level of analysis	25
2.2.4 Cross scale dynamics	25
2.2.5 Temporal dynamics	26
2.2.6 Validation	26
2.3 Mediterranean land cover change studies	28
2.3.1 Driving forces of Mediterranean land cover change	29
2.4 Discussion – a conceptual land cover change model of semi-natural Mediterranean vegetation communities	31
3 Study area and data description	35
3.1 Introduction	35
3.2 Description of the study area	35
3.2.1 Climate	35
3.2.2 Hydrology	37
3.2.3 Geology	37
3.2.4 Lithology	38
3.2.5 Land use and natural vegetation	38
3.2.6 History of the study area	39
3.3 Data description: remote sensing and GIS data	41

3.3.1	HyMap imagery	41
3.3.2	DAIS7915 imagery	41
3.3.3	ASTER imagery	41
3.3.4	Landsat 7 ETM+ imagery	42
3.3.5	Aerial photographs	42
3.3.6	Digital map data and DEM	43
3.4	Data description: field data	43
3.4.1	Field observations	43
3.4.2	HyMap calibration and validation	43
4	Studying types and rates of Mediterranean land abandonment since 1946 using change detection	45
4.1	Introduction	45
4.1.1	Objectives	45
4.2	Study area and data sets	45
4.3	Methods	46
4.3.1	Aerial photograph processing	46
4.3.2	Aerial photograph interpretation and change detection	46
4.3.3	Field survey	47
4.3.4	Data analysis	47
4.4	Results	48
4.4.1	General results	48
4.4.2	Cross tabulations between change class and continuous driving variables	51
4.4.3	Cross tabulations between change class and lithology	51
4.4.4	Cross tabulations between time since abandonment class and driving variables	52
4.4.5	Land cover transitions based on the field data set	54
4.5	Discussion	56
4.6	Conclusion	57
5	Comparing techniques for vegetation classification using multi- and hyper-spectral images supplemented by ancillary environmental data	59
5.1	Introduction	59
5.1.1	Objectives	60
5.2	Study area and data sets	60
5.3	Methods	61
5.4	Results	64
5.5	Discussion	67
5.6	Conclusion	68
6	A contextual approach to classify Mediterranean heterogeneous vegetation using the SPATial Reclassification Kernel (SPARK) and DAIS7915 imagery	69
6.1	Introduction	69
6.2	The concept of SPARK	70
6.3	Case study	73
6.3.1	Introduction	73

6.3.2	Study area and data sets	73
6.3.3	Modified SPARK NDVI approach	74
6.3.4	Results	75
6.3.5	Discussion and conclusion	80
7	Using ancillary data for improving the classification of degraded Mediterranean vegetation with HyMap spectroscopic images	83
7.1	Introduction	83
7.1.1	Objectives	84
7.2	Study area and data sets	84
7.3	Methods	85
7.3.1	Introduction	85
7.3.2	Model implementation	86
7.3.2.1	Phase 1 – inclusion of remote sensing data in the ADCM	87
7.3.2.2	Phase 2 – inclusion of ancillary data in the ADCM	87
7.3.2.3	Phase 3 – fuzzy membership function pooling	90
7.4	Results	91
7.4.1	Conventional classification	91
7.4.2	ADCM classification	92
7.4.3	Generalization of the ADCM classification	95
7.5	Discussion	96
7.6	Conclusion	96
8	Land cover change modelling of Mediterranean vegetation	99
8.1	Introduction	99
8.1.1	Objectives	99
8.2	Study area and data sets	100
8.3	Methods	100
8.3.1	Introduction	100
8.3.2	Model concepts	101
8.3.3	Model description	102
8.3.4	Model running and evaluation	103
8.4	Results	104
8.5	Discussion	105
8.6	Conclusion	107
9	Discussion and conclusions	109
9.1	Introduction	109
9.2	Validation in time	109
9.3	Validation in space	110
9.3.1	Per-pixel based methods	110
9.3.2	Contextual methods	110
9.3.3	Methods using ancillary data	111
9.3.4	Resolution and detection detail	111
9.4	Model building	112

9.5	Concluding remarks	113
	Appendix – Colour figures	114
	Summary	129
	Samenvatting	133
	References	137
	Curriculum Vitae	145
